

704-734-5100

Card Clothing & Services, Inc. manufactures a complete line of Blending and Opening equipment; this includes bale breakers, multiple hopper blending, weigh pan blending, coarse openers, reserve bins, fine openers and related electrical control systems. Options include AC inverter lift apron drives, sonic level control, bale tilting devices, lift aprons, lift apron magnets, metal extraction, spark detection, humidification and all the latest safety devices.

The **CCS** weight control system is a PLC based touch screen system that is manufactured with UL/CE compliant standard off the shelf components such as Siemens, Allen-Bradley and others. The system includes receipt management, active weigh control, trending, spreadsheet reporting, help screens, online support and multilingual text.

CCS high speed fiber openers are manufactured in many different styles; the standard openers are horizontally or vertically fed. All high speed openers can be configured with metallic wire wound cylinders, fully lagged cylinders and claw tooth cylinders depending on the application. **CCS** Blending and Opening systems are capable of producing as much as 1,500 to 2,500 kilos per hour depending on the fiber type, denier, staple length and blend percentages.
